ALLAN G. FARNAZO
Regional Director

12 October 2024
10-21-24 40 357
2-21

Dear RD Farnazo:

We are excited to invite your school publication advisers (SPAs) to participate in our **23rd Word Cup and Eighth Masterclass** in scenic Boracay, Aklan. As a premier professional development opportunity, this masterclass caters to the needs of our teachers in their roles as SPAs. Additionally, we welcome your top students who are passionate about honing their skills under the guidance of experienced practitioners.

Our workshops utilize a learning-by-doing approach, bridging the gap between theory learned in the classroom and practical, real-world experiences. On **December 5-7, 2024** we will offer our innovative experiential training method and provide an engaging and effective way to cultivate lifelong skills in communication and journalism.

To ensure that your teachers and students can benefit from this unique opportunity, we kindly request that the Regional Office **cascade the information** regarding the event. Ideally, we hope this can be funded through the school MOOE or In-Service Training funds, as permitted under Section 17 of the special provisions for the DepEd budget, which covers other learning and development interventions.

The wider dissemination of this opportunity would greatly support the participation of your teachers and learners. As educational leaders, you have the chance to introduce your team to the only authentic journalism training workshop in the Philippines and Asia.

Interested participants can register through this link: <https://bit.ly/23rdWordCupPH>. For further inquiries, please contact me at wordcup.philippines@gmail.com or 0954 190 2247. You can also find more information on our Facebook page, Word Cup Associated Editors Co.

We look forward to your favorable consideration of our request and hope to welcome your SPAs, academic leaders, subject area teachers and campus journalists to this enriching event.

Thank you for your time and support.

Warm regards,

EUGENIO SONNY O. CALAPIT, Ed.D., EnP

REGIONS

Uptrend in science museums investment to benefit DepEd learners

INQUIRER.net / 02:27 PM May 10, 2024

Dr. Carlos Torre is caught in a rope puzzle at Word Cup National Journalism Conference and Contests, where some 250 campus journalists from the 21st Word Cup National Journalism Conference and Contests are held in Taguig City.

MANILA, Philippines—A young campus journalist struggled to free a rope trapped inside a one-meter tall, square-shaped metal device. A puzzle master quickly intervened, demonstrating how to navigate the tubular labyrinth.

This "rope puzzle" was among the many interactive exhibits that captivated the 250 campus journalists and school publication advisers attending the 21st Word Cup National Journalism Conference and Contests held in Taguig City on May 4-5.

May Pagsinohan, executive director of the Philippine Science and Technology Foundation (PSTF), explained that science museums like these are designed to pique children's curiosity and interest in science.

While the PSTF-operated Science Centrum in Marikina remains closed to the public despite the lifting of health restrictions, Pagsinohan acknowledges that investment in science museums in the Philippines falls short compared to ASEAN neighbors.

Manila Times: 'Campus journalism can boost interest in science'

<https://bit.ly/ManilaTimesOn21stWordCup>

B12 Campus Press THURSDAY May 3, 2018

Word Cup Awarded Honor to University of the Philippines Open Access Journal website participants for the 21st Word Cup National Academic Conference and Contest of High School Students, on May 3, 2018. Campus Press is the online platform for the event.

'Campus journalism can boost interest in science'

SOME 265 campus journalists and school paper advisers from across the country can help improve public understanding and appreciation of the value of science in everyday life. Science Communication Philippines Inc. (SciCommPH) head Ruby Rosal-Cristobal said during the 21st Word Cup National Academic Conference and Contest.

Rosal-Cristobal, who is also the head of the Department of Science and Technology (DOST) Office of Science and Technology Communication, said that the event is a platform for campus journalists to showcase their work and to learn from each other. She said that the event is also a platform for the public to learn about the latest developments in science and technology.

Climate action now

By JENNIFER M. JONES

W arming global temperatures. Rising sea levels. Melting ice sheets. Droughts. These are the signs of an environmental crisis that climate change is causing. It is not a distant threat. It is here, and it is now. It is time to take action.

Climate change is a global problem that requires a global solution. We need to take action now to prevent the worst effects of climate change.

There are many ways to reduce greenhouse gas emissions. We can use renewable energy, improve energy efficiency, and reduce our consumption.

It is our responsibility to take action now to protect our planet and our future. We need to work together to make a difference.

The global effects of climate change are already being felt. We need to take action now to prevent the worst effects of climate change.

"Come together because your future is at risk. If we take action now, we can work together toward creating a better future and the future of the next generation will be safe."

Let us find ways to protect the world.

The recent study on climate change is a wake-up call for the world. It is time to take action now to prevent the worst effects of climate change.

It is our responsibility to take action now to protect our planet and our future. We need to work together to make a difference.

The global effects of climate change are already being felt. We need to take action now to prevent the worst effects of climate change.

EDITOR'S NOTE

No one is spared

By JENNIFER M. JONES

Climate change is inevitable. It is not a distant threat. It is here, and it is now. It is time to take action.

Climate change is a global problem that requires a global solution. We need to take action now to prevent the worst effects of climate change.

There are many ways to reduce greenhouse gas emissions. We can use renewable energy, improve energy efficiency, and reduce our consumption.

It is our responsibility to take action now to protect our planet and our future. We need to work together to make a difference.

The global effects of climate change are already being felt. We need to take action now to prevent the worst effects of climate change.

The Philippines has committed to cut greenhouse gas emissions by 70 percent by 2050.

The government has also launched a campaign to encourage people to take action to reduce greenhouse gas emissions.

It is our responsibility to take action now to protect our planet and our future. We need to work together to make a difference.

Saving a critical wetland to promote ecotourism

HAVEN IN THE METRO

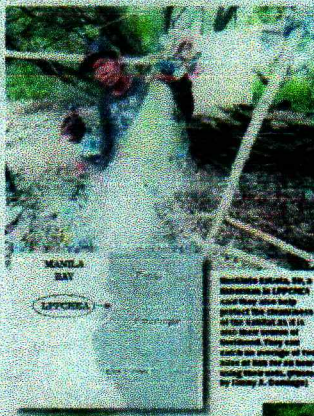

Text by **FRANCIS ARMENTA S. BAYONA**

Within the busy concrete jungle of Metro Manila, there would not seem to be a haven for nature lovers. But just right at the south of Manila Bay, there is a place called the Los Pinos Forest Reserve. Located within the Los Pinos Forest Reserve (LPFR), a part of a highly urbanized area, could still give more space for environmental conservation.

Finding itself by being listed in the Bureau of Environmental Protection (BEP), the LPFR is a haven for nature lovers. It is a place where you can see a variety of birds and animals.

Adding to the challenges, during the urbanization process, the natural habitat is being lost. This is the case in the Los Pinos Forest Reserve. The area is being lost to urbanization. This is the case in the Los Pinos Forest Reserve. The area is being lost to urbanization.

It is also important to note that urbanization is causing the loss of the natural habitat. This is the case in the Los Pinos Forest Reserve. The area is being lost to urbanization.

Los Pinos Forest Reserve, LPFR, is a haven for nature lovers. It is a place where you can see a variety of birds and animals.

The impact of urban expansion is causing the loss of the natural habitat. This is the case in the Los Pinos Forest Reserve. The area is being lost to urbanization.

URBANIZATION is the process of increasing the proportion of a population that lives in cities and towns. It is a process that is causing the loss of the natural habitat. This is the case in the Los Pinos Forest Reserve. The area is being lost to urbanization.

Photo by **Francis Armenta S. Bayona**

A group of people, including children and adults, are gathered around a large tree in a forest. They appear to be engaged in an educational activity or a nature walk.

Urbanization entails with it the promise of increased employment, stronger international ties and a more equitable economic growth. But should this prosperity be at the expense of the environment?

With the loss of the natural habitat, the environment is being lost. This is the case in the Los Pinos Forest Reserve. The area is being lost to urbanization.

With the loss of the natural habitat, the environment is being lost. This is the case in the Los Pinos Forest Reserve. The area is being lost to urbanization.
